Hello James,

Just to let you know that we watched "our DVD" and thought you would appreciate our comments on it. We both were very impressed with it and thought it was beautiful. We were surprised at the high quality of the transfer from cine to DVD considering the age of the films and the fact that many of the shots were originally out of focus or too dark to view. Obviously the focus was not possible to rectify but we did notice that the "dark" scenes were now easy to watch.

The transition from one film to the next works exceptionally well. The music was just right, giving a good quality background without being intrusive of the film.

Congratulations on an excellent job and we will certainly recommend your services to anyone who mentions to us that they would like to save their old cine films in this way.

Thank you so much for giving us back many memories that could have been forgotten in time. Margaret

Hi James

Just tidying up my inbox and realised I didn't thank you for the wonderful job you did on my cine films.

I watched them with my daughter and also copied and forwarded them to my son in Australia, who killed himself laughing over his father's haircuts!!

Hello James

We received the DVD and cines today and have just finished viewing. Many thanks for your help and we are delighted with the results considering the age and type of equipment used at the time. It makes you appreciate how technology has advanced since the advent of video cameras.
